

EVALUATION OF SAFETY AND SECURITY POLICIES

Seminar series organized by

GSSI
Gran Sasso Science Institute

and

CNR – Ircres
Research Institute Sustainable
Economic Growth

This seminar series will present some research studies on the evaluation of safety and security policies. The risks addressed by these policies appear to be very far from each other, nevertheless they share some common features and issues than represent a common ground for researchers. For this reason, the seminars will open the discussion over the boundaries of the community of field specialists, with the goal of building a common wisdom as economists. We will explore new concepts and methods to afford the huge challenges that socio-economic analysis and impact evaluation face when addressing safety and security.

The seminars will occur on the last Wednesday of each month in the early afternoon. Calendar:

- January 26th **Evaluation and Road Safety Policies: the Case of Speed Limits**
- February 23th **Evaluation of Occupational Safety Incentives**
- March 30th **Economics for disaster preparedness**
- April 27th **Economic analysis and evaluation of cybersecurity (to be confirmed)**

Evaluation and Road Safety Policies: the Case of Speed Limits

Wednesday 26/01/2022, h. 14:00-15:30

First seminar of the series EVALUATION OF SAFETY AND SECURITY POLICIES, jointly organized by GSSI and CNR-Ircres.

Speakers:

Laurent Carnis and Dominique Mignot (Université Gustave Eiffel): *Assessing Speed limit change: means and constraints*

Maïke Metz-Peeters (University of Bochum): *The Effect of Speed Limits on Accident Frequency on the German Autobahn – A Causal Machine Learning Approach*

Benoît Hiron (Cerema): *A comment on presentations*
